LIVE ANIMALS TRANSPORTATION
BASIC COURSE

VIRTUAL CLASS IN ENGLISH

Description ⓘ

Become an expert in air freight transport of live animals and understand all operational processes and regulations! Due to hands-on exercises, you will gain a comprehensive and valuable insight into the practical processes. This can lead to an increase in quality, efficiency, risk and cost minimization in your company.

This virtual course provides solid basic knowledge on the transport of live animals, from reservation to loading and documentation, taking into account the current legal situation and regulations. Learn about the special requirements for live animal transports in air freight and gain in-depth knowledge of the legal framework and all necessary precautions to bring your live cargo gently and safely to its destination. In addition to the current safety standards, you will learn interesting facts about classification and behaviour of the animals to be transported and receive practical tips.
